

Caption for supplementary Figures

Concordia diagrams for detrital zircons in samples from the Tswaane Formation, Okwa Group. Error ellipses shown with blue colour represent grains with $^{206}\text{Pb}/^{204}\text{Pb} > 2000$. White ellipses represent grains with $^{206}\text{Pb}/^{204}\text{Pb} < 2000$, which are excluded from consideration because of the elevated common lead correction needed (see Andersen et al., 2019, Earth-Science Reviews, <https://doi.org/10.1016/j.earscirev.2019.102899>).
